### Bleed Area: 216mm x 154.5mm

Extend your background to fill the 'bleed area'. This will make sure you don't end up with white edges when your document is trimmed.

### Trim: 210mm x 148.5mm

This is where we aim to cut your document.

### Safe area: 175mm x 138.5mm

Keep all the important information of your design - text, logo, icons - inside this safe area.

## DO

- Edit and save your file in CMYK colour mode.
- Outline your text before saving (select all of the layers, click "type" in the menu, select "create outlines").
- Background colour/images must bleed to the edges of artboard

## DON'T

- Flatten your layers or image before saving - it can reduce your print quality.
- Do not scale the artboard
